

Data Breach Response

Protect your Company with Data Breach Response

In today's world of electronic commerce and database-driven information systems, businesses have become custodians of large amounts of detailed personal data. With ID theft ranking as America's fastest growing crime, there is mounting concern about the consequences of data breaches. A company's confidential customer data is a prime target for hackers and identity thieves who can wreak untold financial and personal havoc.

Consumers expect businesses to keep their sensitive private information secure, and the potential liabilities stemming from a data breach can be staggering. Companies are actively searching for protection against this threat.

SUPPLY DATA BREACH PROTECTION

Be ready to protect your customers by purchasing Data Breach Response services from Europ Assistance USA. You'll have a solution to help your customers from the negative effects of breached data and identity theft. Should your company become a victim of a data breach, Europ Assistance USA will ...

1. Notify all customers who have had personal information stolen due to the data compromise.
2. Give these customers access to one year of free credit monitoring services.
3. Provide ID Theft Resolution Services if the compromised information results in theft.

ID THEFT RESOLUTION SERVICES—BUILT-IN PEACE OF MIND FOR CONSUMERS

This comprehensive program is designed to help victims quickly and easily recover from identity theft. An assigned Identity Theft Specialist with "Real Time" access to credit records will help victims respond quickly and appropriately to stop additional damage, and to ensure that all fraudulent activity is removed from the victim's name. This service can save consumers hundreds of hours in recovery time, not to mention the financial and emotional benefits.

For a complete list of the specific benefits and functions of this valuable protection service, contact Europ Assistance USA today.
